

TDF FOLDERS

HAND, PNEUMATIC & HYDRAULIC OPERATED FOLDER

TDF Hand Folder

TDF Hydraulic Folder

TDF Pneumatic Folder

TDF Folders are used with TDF Flange Formers. It has slots on the bottom bed in which the formed flange sits during folding operation. With this machine you can make 'L' profiles or fill wrap around duct-work. TDF Folders are available in three versions-Hand, Pneumatic & Hydraulic Operated.

A heavy duty welded steel frame with strong top and bottom beam makes the machine very strong and good for long life. It is a perfect companion to TDF Flange Former.
