

BEADING MACHINE

Model BM 2500

Model BM 1250

Beading machine is a boon for medium and small duct manufacturers. BM - 2500 has one pair of power rolls and one pair of beading rolls. Sheet is placed on entry table touching guide fences and then passed through the machine.

It forms beading on the machine which would strengthen the sheet.

The ducts made using Beading Machine look very professional and are stronger compared to plain ducts. It is an excellent option compared to age-old hand method of cross-breaking.
