

CNC PLASMA CUTTING MACHINE Spitfire

WNS India, through the years, has provided innovative products to its customers in HVAC to take manufacturing duct-work to a different level altogether. This influence on duct-work making sets us significantly apart. Yet another introduction in our effort to give world class products to our customers is our latest innovation— CNC Plasma Cutting Machine. Rugged yet flexible plasma cutting machine is a great solution for processing HVAC duct fittings. Rack and pinion drive provides superb positioning accuracy for unmatched part quality. Fast, clean and accurate, our CNC Plasma Cutting system drastically reduces waste material and operating costs resulting in greater profitability.

However our machine is designed for HVAC application and as such can take load equivalent to 2 mm thick, 1,500mm x 3,000mm sheet.

Cutting Area

- 1,500 mm x 3,000 mm (Approx. 5 ft x10 ft)

Machine Control

- Starfire or Similar

Cutting Unit

- Hypertherm PowerMax 45 or similar

Cutting Capacity

- PowerMax 45 cutting capacity is 2 mm in Mild Steel

SPECIFICATIONS

Length	4,000 mm
Width	2,200 mm
Height	1,200 mm
Weight	800 Kgs
Electrical Connection	415 Volt, 50 Hz, 3 PH
Cutting Speed	8,000
