

## BENDING ROLLS, HAND & POWER

**POWER BENDING ROLLS**  
**Model PBR 1250**

**HAND BENDING ROLLS**  
**Model BR 1000 & BR 1250**

W. Neal Services hand operated and motorised Initial Pinch Bending Rolls are used to curl the sheet metal by rolling it. The hand operated machines are equipped with SLIP ROLL which allows material to slid out once it is rolled.

The motorized machines have a reduction gear box drive and forward /reverse foot switch for easy operation. The Rolls are ground and hard chrome plated for long life. The stand is a strong MS construction with powder coating for long lasting finish.

### SPECIFICATIONS
